Experience

Vauldex Technologies Inc — Mobile Application Developer

January 2023 – Present

- Develop native Android applications using Kotlin and Jetpack Compose and native iOS applications using Swift and SwiftUI.
- Build scalable and maintainable mobile features using MVVM and Clean Architecture.
- Integrate REST APIs, authentication flows, local storage, and state management solutions.
- Collaborate with designers, backend engineers, and QA teams in Agile/Scrum workflows.
- Support production releases, debugging, profiling, and application optimization.

Published Android Applications

Google Play Store Developer Profile

- Published and maintained Android applications under Ronj's Studios on Google Play Store.
- Built applications focused on modern Android UI development, user experience, and maintainable architecture.
- Continuously experiment with Kotlin, Jetpack Compose, API integrations, and mobile performance optimization.
- iOS versions are currently in development and pending App Store publication.
