PROFESSIONAL SUMMARY

Mobile Application Developer specializing in native Android and iOS development. Experienced in building maintainable applications using Kotlin, Jetpack Compose, Swift, and SwiftUI, with hands-on use of MVVM and Clean Architecture. Skilled in REST API integration, debugging, release support, and cross-functional collaboration with designers, backend engineers, and QA teams in Agile environments.

TECHNICAL SKILLS

Mobile Development: Kotlin, Jetpack Compose, Swift, SwiftUI

Architecture: MVVM, Clean Architecture

Integration: REST APIs, authentication flows, local storage, UI state management

Tools & Workflow: Git, CI/CD, Jira, Agile/Scrum

Quality: Debugging, profiling, QA support, basic test automation

PROFESSIONAL EXPERIENCE

Mobile Application Developer | Vauldex Technologies Inc | Jan 2023 - Present

- Develop and maintain native mobile applications for Android using Kotlin and Jetpack Compose and for iOS using Swift and SwiftUI.
- Build modular, testable features using MVVM and Clean Architecture to improve maintainability and support long-term scalability.
- Integrate REST APIs, authentication flows, local storage, and state management to deliver reliable user experiences.
- Collaborate with designers, backend engineers, and QA teams in Agile/Scrum workflows, including sprint planning, code reviews, testing, and release preparation.
- Troubleshoot issues, profile application behavior, and support quality assurance activities to help deliver stable production releases.

EDUCATION

Bachelor of Science in Electronics Engineering

Technological University of the Philippines - Visayas | 2017 - 2021

Computer Engineering Technology

Technological University of the Philippines - Visayas | 2011 - 2015
